RE: *Aligned Data Centers SLC05-07 Conditional Use Permit, Letter of Intent*

To whom it may concern,

This letter is to accompany the submittal for the Aligned Data Centers SLC05-07 project, a 93.27- Acres parcel, zoned M-1, and located at 6881 W 9800 South, West Jordan, Utah. As per the M-1 zoning, "**Utility, major**" use, described in the zoning code as transmission lines with a capacity of sixty nine (69) kV or greater, require a Conditional Use Permit.

After working with Rocking Moutain Power (RMP) on power options to the SLC05-07 campus, a 138 kV Transmission Line extension was identified as the solution to serve the three (3) building data center campus which is already site plan approved with one (1) building nearing completion. The transmission line extension involves Aligned Data Centers to working directly wih Rocking Moutain Power on the 138 kV Transmission Line extension that will tie into an existing pole and route west along Wells Park Road, south along the proposed section of 6600 West Street, west along 9800 South, into and through the Aligned Data Center Parcel, and eventually to tie back into an existing pole along Old Bingham Highway. An onsite and offsite site plan has been provided to outline the proposed project and route.

Sincerely,

Cardell Andrews
